

Write a program that asks you your name and age using the following prompts.

“Please Enter Your Name: ”

“Please Enter Your Age: ”

Store the name in a C++ string variable and the age in an int variable. Then print the following line:

“Hello my name is \_\_\_ and I’m \_\_\_ years old.”

Fill in the name and age from the data you read.

Upload your program to the class upload site:

<http://csi-info.baylor.edu/upload>

Test your uploaded program to make sure it works.

See you next week.
