

The Party

Last weekend I went to a party for graduates of Baylor, A&M, and SMU. As we all know, Baylor graduates always tell the truth, A&M graduates always lie, and SMU graduates make statements that are alternately true and false. I ended up talking to four groups of people I didn't know. Each wore a name-tag supplied by a Baylor graduate (so they were accurate) but the name tags didn't indicate where anybody was from. But after talking to the people, I was able to figure out where everybody was from.

The first group was two people I didn't know anything about.

Arnold

1. I am from A&M.
2. Neither of us is from Baylor.

Belinda

1. I am from Baylor.
 2. Arnold is from A&M.
-

I didn't know anything about the second group either.

Alice

1. I am not from Baylor.
2. Cindy is from SMU.

Brandon

1. I am not from A&M.
2. Alice is from Baylor.

Cindy

1. I am not from SMU.
 2. Brandon is from A&M.
-

The host, who was from Baylor, told me that the third group had one person from each school.

Andrew

1. Chester is from A&M
2. Bonnie is not from Baylor

Bonnie

1. Chester is not from Baylor
2. Andrew is from A&M

Chester

1. Bonnie is from SMU
 2. I am not from A&M
-

The host also told me that the fourth group had one person from each school.

Angie

1. Neither Chuck nor I are from SMU
2. Byron is from A&M
3. Byron's second statement is true.

Byron

1. I am not from A&M
2. Chuck is from SMU

Chuck didn't say anything.
