1. You have your ActiveX control compiled and running. Now you want to put it on your web page and distribute it through the Internet. What steps do you need to follow to do this?

2. Describe how Events, Properties, and Methods are implemented in ActiveX, COM, and JavaBeans.

3. Why isn’t CORBA a component technology? Why is it important?

4. List three different component categories and describe, briefly, how Events, Properties, and Methods are used in each.
