We will be covering Handouts 1-24, several research papers, and the future of component-level design, including current research here at Baylor.

You will be required to create several ActiveX controls as part of the course, and you will need to present one research paper during the last week of the course. Presentations will last 20 min with 5 min for questions.

If the schedule goes as I expect it to, we will finish Handouts 1-24 in the first 3 weeks, and will cover research papers during the last 2 weeks.
